

Baptists Will Dedicate New Chapel Unit Sunday

Members of the South Bay Baptist Church will celebrate the climax of two years' labor Sunday when they dedicate their new chapel unit at 4645 Shayne Lane.

The \$23,000 unit has been a project completed mostly by volunteer laborers working in the evenings and on Sundays. Since its founding in 1952, the church has been forced to meet in cramped or makeshift surroundings. During that time the membership has doubled.

Planned for future construction are two educational buildings and a sanctuary unit.

Moffitt to Speak
Dr. Claude L. Moffitt, pastor of the Hoover St. Baptist Church, will deliver the dedicatory address for the services, which will begin at 2:30 p.m.

Other dignitaries to participate in the dedication include the Rev. George F. Cain; members of the local boards and committees; Dr. Woodrow Rood, president of the Conservative Baptist Assn. of South California; the Rev. Leo Bye, representing the local Conservative

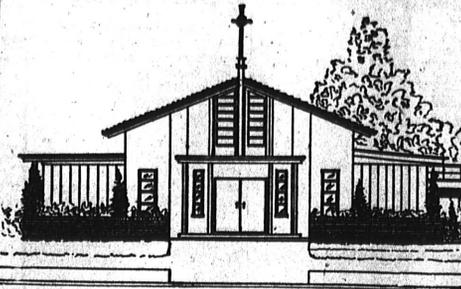

Baptist Assn. churches; Mrs. Edward Larson, Conservative Baptist Foreign Mission Society.

Dignitaries Will Attend
Mayor Nicholas O. Drake; Robert Wood, Gamble Associates, church architect; the Rev. Cecil M. M. M. member, Centinela Baptist Church of Inglewood; the Rev. Roy Nelson, First Baptist Church of San Pedro; and Dr. Robert Dennis, general director of the Conservative Baptist Assn. of Southern California.

James Taylor will sing "The Holy City," while the choir will sing "Thanks Be to God" and "Except the Lord Build the House." The director is Charles N. Sutphen.

In evening services Dr. Dennis will be the guest speaker. In morning services, Rev. Cain will speak on "The Dedicated Life."

Christian Endeavor groups will meet at 6:30 p.m., and will attend the CE Sing at the Church of the Brethren in Hermosa Beach.

TWO YEARS WORK
... Members of the South Bay Baptist Church will celebrate the results of two years of their own labor Sunday as they dedicate their new chapel unit. Built mostly by volunteer labor, the chapel is only the first unit of a contemplated building program. Planned for the future are 2 educational buildings and a sanctuary unit.

Dr. Schafer Will Speak

Dr. O. E. Schafer, district superintendent, will bring the message at evening services at the Central Evangelical United Brethren Church, and conduct the local conference meeting which follows.

Brief reports will be given by church officers at the meeting.

Next Thursday, the Ladies Guild will hold a smorgasbord in the guild hall, which is open to the public.

The climax of the Sunday School attendance drive will be celebrated a week from Sunday, with a breakfast in guild hall.

Special two-week evangelistic meetings will start Jan. 30 and continue through Feb. 13.

Rev. Prout to Speak On Christian Doctrine

"Christian and False Doctrines" will be the sermon topic of the Rev. Elmer Prout at 11 a.m. services Sunday at the Church of Christ, 1217 Cravens Ave.

In evening services at 6:45, he will discuss "Problems Youth Can Hope to Solve."

HE TALKED WITH TITO...
As the first in a series of Sunday evening programs at the Walteria Community Methodist Church, the Rev. Wendell Miller, world traveler, and lecturer, will present a slide lecture about Yugoslavia, entitled "Talked with Tito." In morning services, Rev. Gene Gehres will discuss "The Price We Pay."

SALVATION ARMY HAS BEST YEAR

Donations of salvage materials by residents of this city helped make 1954 the biggest year in the history of the Salvation Army Social Service Center serving Torrance.

Brigadier William J. Parkins, manager, said Red Shield trucks traveled 295,000 miles collecting 5,507,275 pounds of throw-away articles.

The materials were processed in workshops of the local center, providing 268,550 hours of occupational therapy for needy and handicapped persons.

The report showed that workers processed and repaired a total of 224,000 garments and 32,750 pairs of shoes, and 175,000 miscellaneous articles.

The center provided 60,180 meals, 20,150 lodgings and paid a total of \$190,000 in wages to all categories of workers at the Center. There were 425 client workers admitted to the Center.

Brigadier Parkins urged local residents to continue making contributions of castoff but still usable articles to the Salvation Army so it can continue its social rehabilitation program.

Needed articles include clothing, shoes, furniture, household appliances, radios, bedding, rugs, dishes, stoves, toys, books, rags and miscellaneous articles.

A telephone call to FA 8-1035 will bring a Red Shield truck to home or office.

Truth Named Sunday Topic
"God shall send forth His mercy and His truth" (Ps. 57:3). This Scripture is the Golden Text of the Lesson-Sermon "Truth" in all Christian Science churches Sunday.

The sermon will stress the value, power and availability of God's healing truth. It includes this admonition of Paul in his first epistle to Timothy (2:15-16): "The power of all supplications, prayers, intercessions, and giving of thanks, be made for all men;—For this is good and acceptable in the sight of God our Saviour; Who will have all men to be saved, and to come unto the knowledge of the truth."

This Scripture will be correlated by these words from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, "Life, Truth, and Love are the realities of divine Science. They dawn in faith and glow full-orbed in spiritual understanding." "Material sense does not unfold the facts of existence," but spiritual sense "transfers human consciousness into eternal Truth." (pp. 298, 99)

PASSOVER SHOWN... The Rev. Oscar Stern, prominent Hebrew Christian and refugee from Czechoslovakia, will present a demonstration of the Jewish Passover at 7 p.m. services at the First Lutheran Church Sunday. The demonstration will show the traditional elements of the ancient rite.

AIR NEWS from NORTH AMERICAN

Mental Talks To Continue

Continuing a series of sermons on the "Basis of Jesus' Maturity," the Rev. John L. Taylor will speak on "He Centered His Life in God" at 9 and 11 a.m. services Sunday at the First Methodist Church.

At 10:05 a.m., Mrs. Dorothy L. Law will continue her discussions of mental health problems with a talk on "Helping Your Child Learn About His Body."

A film, "Hostility," will be shown at 7:30 p.m. service.

Faith Class Continues At Park View Church

The second in a series of classes in instruction in the Christian faith and life will be continued tonight by the Rev. Karl S. Delschlager, of Park View Lutheran Church.

The classes meet at 8 p.m.

THE PEACEFUL ATOM...IT'S WORKING FOR YOU!

North American Aviation early saw the need for development and application of the atom to peaceful purposes. Using its own funds, the company set up an organization staffed by leading atomic scientists and engineers. This Nuclear Engineering and Manufacturing organization conducts work for the Atomic Energy Commission and has initiated many new developments in nuclear applications.

This continuing effort has produced several types of research reactors. Two important examples of these, produced for the Atomic Energy Commission, are now in operation. One is being used by the company for advanced developmental study of

other reactor designs, and general nuclear research is being done with the other. Other North American designed reactors for industrial and medical research will soon be in operation.

Still another example of North American's advance in this field is the "Sodium Reactor Experiment," a new reactor concept in atomic power. This development is being jointly financed by the Atomic Energy Commission and the company. From this will come many answers to the problem of producing economical electricity from the atom.

Engineers: North American offers unusual opportunities. Write: Engineering Personnel Office, Los Angeles or Downey, California; or Columbus, Ohio.

ENGINEERING AHEAD FOR A BETTER TOMORROW NORTH AMERICAN AVIATION, INC.

WING GRID GETS BIG SQUEEZE. Capable of 7,000 tons pressure, North American's Columbus, Ohio Division's new hydraulic press "squeezes" pre-heated grids for Fury and Sabre jet wings into a perfect contour, then automatically quenches them with 95 gallons of water. As the grids cool they tend to shrink, but the tremendous pressure holds them firm—maintaining the correct size and contour permanently. This new production technique helps North American Aviation build planes faster—better, and at less cost.

NEW TRANSONIC SABRE TRAINER. Latest version of the famed North American Sabre jet is the new TF-86—designed to meet our country's need for an advanced transonic trainer for pilots who will fly our latest supersonic fighters such as the F-100 Super Sabre. The TF-86 has a speed in excess of 650 miles per hour in level flight and can exceed the speed of sound in a dive.

TINY TOOLS FOR GUIDED MISSILES. At North American's Downey Calif. Plant, Mechanical Research Technician Al Slare creates special tools which speed production of highly intricate guided missile components. For example, a highly intricate guided missile precision gears five times faster than previous methods... just one of the many ingenious and delicate devices which are needed to accomplish the unusual research and development jobs in North American's long-range guided missile program.
